

Marvelous mesmerizing mind blowing magnificent majestic miraculous Mariam Khan

Old Bridge, NJ | mariamkhan8805@gmail.com | 732-520-9055 | [Linkedin](#) | [Portfolio](#)

SUMMARY

CS/Data Science recent grad targeting **associate/junior PM roles**; blends hands-on AI & engineering with customer-facing product experience—coursework in ML, Data Management, Regression Methods; Duke University AI Product Management Certification.

EXPERIENCE

Product Specialist, Apple

July 2026 - Present

Freehold, NJ

- Diagnosed product/software issues for **100+ customers** weekly, identifying **recurring pain points** and building structured troubleshooting workflows that **improved resolution speed and accuracy**
- Connected **20+** local business owners to tailored Apple Business resources based on individual needs assessments, closing product knowledge gaps and reducing repeat support inquiries by **15%**

AI Automation Extern @ Pfizer, Extern

June 2026 - Aug 2026

Remote

- Identified that clinical teams lost hours manually hunting data across vendor files; defined requirements and success metrics, then built an **AI-powered document extraction pipeline** (RAG, OCR, open-source LLMs) projected to cut manual search time by **90%+**
- Benchmarked competing OCR and retrieval approaches, translating technical trade-offs into a strategic **recommendation report** and **interactive demo** for stakeholder decision-making

Data Engineering Intern, CrisPRO.ai

Aug 2025 - Oct 2025

Holmdel, NJ

- Deployed a **genomic foundation model** into CrisPRO's **clinical AI pipeline**, enabling faster variant interpretation for oncology applications
- Scoped and designed **ETL workflows** for genomic and clinical data through weekly collaboration with a team of **~4 engineers**, structuring datasets for ML model training and patient-trial matching

PROJECTS

RxWatch: Drug Shortage Prediction Platform | Independent Research | [Github](#)

In Progress

- Researched **5+ peer-reviewed and government sources** (GAO, AJHP, PLOS), identifying a methodological gap where independent pharmacies lack access to shortage-prediction models larger chains rely on
- Engineered a **Python data pipeline** using the **openFDA REST API** to merge and run analyses on multiple datasets to surface early signals on shortage risk factors
- Currently designing a **pharmacy-facing risk-scoring interactive dashboard** to translate FDA regulatory data into an actionable planning tool benchmarked against published shortage-prediction studies (logistic regression, ML classifiers, **69–93% accuracy** across hospital and pharmacy settings)

Clara: Insurance Claims Automation | RWJH x Rutgers Health Hackathon | [Github](#)

October 2025

- Identified a critical inefficiency in insurance claims review and led **end-to-end product development** at a 48-hour hackathon, defining **scope** and coordinating technical and clinical requirements to ship a **working agentic AI demo**
- Deployed specialized **AI agents** to automate high-risk claims review and extraction of unstructured medical data, reducing manual processing time by **65%** and **improving policy/regulatory compliance**

LEADERSHIP

Co-founder & Marketing Director, Tech Collaborative

July 2025 - May 2026

New Brunswick, NJ

- Co-founded a **tech initiative** connecting students and mentors, raised **\$2k+ in sponsorships**, grew social media to **190k+ interactions**, and attracted **70+ attendees per event**, making it one of Rutgers' most active tech organizations

Marketing Director, United Mission for Relief & Development

Sep 2024 - May 2026

New Brunswick, NJ

- Spearheaded digital marketing and community outreach campaigns, driving **250k+ digital engagements**, securing **\$20k+ in donations**, and attracting **400+ peak attendees** to fund critical global relief initiatives.

SKILLS

Product & Collaboration: Notion, Figma, Tableau, Power BI

Technical: Python, R, SQL, Java, JavaScript, Git

EDUCATION

Rutgers University, New Brunswick, NJ

Sept 2023 - May 2026

Bachelor of Science (Cum Laude) in **Computer Science and Data Science**
